This is your chance to play as a real pilot in the skies of Altis, or make the skies your own and become a commander of your own jet fighter squadron. The Arma 3 Jets DLC features two unique aircraft, each packed with advanced systems and customizations. Pilots will be able to fly from the carrier aircraft carrier, or accompany their team on low-altitude combat. Air-to-air combat, equipped with robust weapons and systems, will be a true test of pilot skills. Fight alone or with up to 3 teammates in local or online multiplayer, all of which are facilitated by the game's dynamic vehicles. But don't get it twisted: this is no game - it's Arma. This means that Arma 3 Jets supports a large network of existing and future Arma 3 mods. Do you want to see a SAM fighter jet with its pylons and weapons bay missing? Do you have your own custom jet fighter that you'd like to share with the world? No problem. This DLC allows players to make their own missions and make their own aircraft. You can even contribute to Arma 3 Jets - those of you who have an Arma 3 license can share content and even submit missions to the Arma 3 Jets community. Key Features F/A-181 Black Wasp II - The F/A-181 Black Wasp II is a fifth-generation, single-seat, twin-engine, all-weather tactical fighter jet. The aircraft was designed primarily as an air-superiority fighter, but also has ground attack capabilities. Its additional external hard points enable the aircraft to carry a wide variety of weapons configurations. The Black Wasp is fitted with the required equipment for carrier operations. To-201 Shikra - The To-201 Shikra is a fifth-generation, single-seat, twin-engine, all-weather tactical fighter jet. The aircraft was designed as a multi-role platform at an affordable cost, and unlike some of the larger air-superiority jets, it can also perform well in low-altitude flight. Despite its aging platform, the A-149 has still been upgraded with the newest sensors and weapons systems. A-149 Gryphon - The A-149 Gryphon is a fourth-generation, single-seat, single-engine, and all-weather tactical fighter jet. The aircraft was designed as a multi-role platform at an affordable cost, and unlike some of the larger air-super

Because of piracy ships are forced to gather in ports, stuck in crowds, have no place to go, nowhere to steal from, just waiting for the attack of either navy or sea monster. You need to collect gold skulls, and best of all they don't belong to anyone. Golds belonged to the goldless. You need to find them, take them, and return them to their owners. Anyone wants gold skulls? Anyone will pay for them? I want to know if someone is willing to pay for an arm and a leg, I will gladly deliver them! Rise of the Rest - Saviofolio ===== TheAceOfHearts Interesting that there's no discussion of the report. It's pretty shocking that only 1/3 of the articles are critical, and that the media, academia, public companies, and governments are promoting Chinese influence so loudly. ~~~ DarkKomunalec It's shocking because we aren't being exposed to _true_ Chinese influence in various ways, just Chinese-influence-for-advantage through funding of Western companies. But it happens that such influence is stronger when the negative side effect is better known, and thus controversial. ~~~ TheAceOfHearts Yes, that's true. Public perception is quite poor in that respect. In any case, from the article's text, it sounds like there's a huge problem here. ----- jerev This article is anecdotal and lacks any real evidence. I had never heard of any of these academics before. It's not clear to me whether they are government sponsored. ~~~ tyre Theres some critical mass here ----- elektor Meh. No mention of how the Western world also tried to gain influence by pushing American culture (think Hollywood). China has nothing on that. The chinese government has their music and tv staples and they are par for the course but Hollywood is huge and they influence a huge
