Hero Boy: The RPG Dreaming has been quite a bumpy ride for me in recent years. After the release of Horizon, I started on a new project. After being sidetracked by work and other projects, I was fortunate enough to sit down again after 2 years and work on it full time. This has been a very difficult project for me because I'm not the type of person who's good at balancing everything. This game is a fusion of two things I'm good at; making pixel art and making games. This will be my first time making a pixel art beat-em-up after years of making platformers and 2D beat-em-ups. There are currently 2 weeks left to support the game. Come and show your support. Main Features: Extensive Enemies: Contains over 200 unique enemies. Controls: You will primarily be fighting large groups of enemies. You will be able to block attacks, counter attack, charge up your special move, and hold down on the buttons to quickly execute special moves. Enemy Attack Patterns: The enemies will use a combination of melee, ranged, and area of effect attacks. Melee Attacks: The aim of the game is to defeat the enemies as quickly as possible so you don't get knocked down. If you are knocked down when you're hit with a melee attack, you can still block the attack if you hit the block button. Ranged Attacks: Like melee attacks, the aim of the game is to defeat the enemies as quickly as possible so you don't get knocked down. If you are knocked down when you are hit with a ranged attack, you can still counter attack and block the attack if you hit the block button. Area of Effect Attacks: Your special moves cover a large area around you in a tornado. The special moves have different kinds of effect to help you defeat enemies and damage your opponent. This is a mixture of melee, ranged, and area of effect attacks. Special Moves: You will be able to unlock a variety of special moves as you progress through the game. The special moves have different effects to help

you defeat enemies and damage your opponent. Upgradable Weapons: You will be able to upgrade your weapons over time as you play the game. As you play, you can purchase weapons. The way your weapons are designed will change how the special move works and the way you attack enemies. Easy

Story: is an augmented reality game developed by Salto in Japan. Its player plays as a witch in a witch's house that floats in mid-air.Players can cook and bring forth ingredients for their own dishes while exploring the house and town, and can then eat what they have created. Some of the items can be eaten by pulling them towards themselves and that creature will become a dessert. The witch has a children's book that she carries around with her, and conversations can be established with it. The game can also be played with a smart device. The original version was released on December 29, 2018. The game's second update was released on June 27, 2019. and the third update was released on August 28, 2019. A new version was released on January 6, 2020. Gameplay The gameplay consists of cooking and interacting with different items found in the environment, as well as baking a variety of different foods that the witch consumes. The player can play with up to eight different "melons" or "baskets" that can be used to interact with the

environment, and by tilting the player's device they can play with the items found in the world. Additionally, the player can read the book kept on the player's witch as well as cookies that are dropped by monsters around the house and town. Cooking The witch can prepare different dishes that she can eat by using the melons, such as cookies that can be made by touching the fish that drop by themselves. These items can be consumed either via a splat-screen by hitting the specific basket that the item came from, or if the player wants to eat them off the ground. Phantoms The witch has the ability to create certain items that she can collect over the course of the game, and can add them to the "basket". Phantoms have different properties and items, such as ghosts that drop various items, cats that play music when caught, and octopuses that drop cooked items upon capture. Phantoms can only be used by the witch with the bucket that they have been collected in. Phantoms have six special properties or properties, and each has four different types: the main, second, third and fourth. When a phantom's property is used the property changes and the items in the "basket" change. If the

Humanless is a 2D action game in which you play a "Humanless". In other words, a person with superhuman speed and agility that can bend gravity to his liking. He can jump over buildings, dashing through them in a single jump, and dodge arrows with an ease unlike a human. He can also jump over explosions or faster bullets with a single jump. Being a Humanless, the player must avoid traps, avoid mines, and fight against a variety of varied enemies trying to kill him. The player must have the ability to survive and defeat enemies with the use of his constantly growing arsenal of weapons. The humanless also feels he is being chased and hunted. His enemies are launching death rays, mines, and arrows in an effort to kill him. The game can be played with either a keyboard or a gamepad. The controls are very simple: the humanless runs by pressing the "A" key on the keyboard, and jumps by pressing the "B" key on the keyboard. The player's health and ammunition levels are displayed as a radial gauge on the top left and right of the screen, respectively. The player's health will be regenerated if he takes a break and returns to the level. The player can carry three ammunition belts and can replenish his ammunition by using a replenishment orb that he can collect from

enemies on the battlefield. Key Features: 20 levels with unique gameplay - the only copy in the world!
