Q: JavaScript XMLHttpRequest POST/GET/JSON file content I am using a file upload method for my application, and it is working, but it is a bit of a hack. How can I upload a file using XMLHttpRequest? I also need to read the content

of the file and return that data. A: If you have a file input, then the file will be posted to the server via XMLHttpRequest. Then on the server side you would have to read the contents of the file and do something with it. Maybe print it out in the server's HTML, maybe save it to a database, or maybe do whatever the application you're building does.
