Record the application sounds (volume change, etc.) record the standard Windows sounds (the power down, etc.) record Windows application sounds. watch the time: record your actions in the specified time interval record the mouse movements: record any mouse movement record the "print" key: record all actions when you press the "print" key on the keyboard Record any key pressed on the keyboard. record any mouse click. record the mouse pointer. record the mouse left click on the screen. record a window name or URL. record the text you write on the screen. record the command line input. record the mouse buttons: record left, middle, right mouse buttons record the keyboard: record the keyboard: if the keys are held down, they will be recorded. record the current Windows state (active window, window caption, application name, status bar, etc.) record the system sounds: the sounds of the start up of Windows, of various system sounds (beeps, power down, computer shut down, etc.) record any message sent by an application or any email address on the system (program name and error message, etc.) record all standard windows sounds (the power down, etc.) record any type of sound from the microphone (Sound Recorder) Record the next action after holding down the selected button. Record any file/folder name, path and file date. Record any file name, path and file date 2edc1e01e8

BPMinus

BPMinus is a handy and reliable application designed to help you reduce the BPM value of an audio file. Its primary function is to help you transcribe or simply understand audio files. BPMinus comes with an impressive support of audio formats. You will only need to replace the WAV file extension by MP3, MP4 or WMA if you want to play your track with BPMinus. This audio player also allows you to change the BPM value of your audio file, as well as the audio settings. BPMinus can process numerous formats. All you have to do is to install it and connect it to your audio track. The audio player will begin to play the file. You can choose to display the waveform, or to output your file with BPMinus. There is also a possibility to play your audio file at a slower speed. BPMinus is the perfect tool for professionals looking to increase the quality of their work. Music Scraping - is a product that allows you to create a database of music from the web. You can import music from various sources, like YouTube, Google, and iTunes. Music Scraping Description: With Music Scraping - is a tool to create a music database. You can import music from YouTube, YouTube, and iTunes. You can also import music from Google, and add it to the database. Note-book is a very versatile, and user-friendly note-taking application, which combines a classic, and easy to use interface with some handy features. Note-book Description: This application has got a huge set of features, and is very user-friendly. As mentioned, it comes with a clean interface, which looks just like Windows 7. You can create new notes and import the contents from various sources. You can also organize your notes and tag them, and even import media content, like music or videos. There's also a lot of available themes and options, as well as fonts. This might be something new to you, but the SpeedScrubber is a very powerful tool, designed to let you edit audio or video files with super precision. SpeedScrubber Description: If you're looking for a tool that can help you slow down, or speed up audio or video files, this application is exactly what you need. You can scrub the selected material at a fixed speed, or change the number of seconds. You can use the Double or Triple Keys,
